## FOREWORD

Praise be to Allah SWT who has bestowed His Grace, Taufiq and Inayah, so that on this occasion I was able to complete the Community Service Program activities in village of South Panti, Pasaman District, as well as complete the report. This course is a student practice activity which is one of the requirements for obtaining a Bachelor Degree in the Faculty of Education, Padang State University.

In implementing this course program, I have received a lot of guidance and suggestions from various parties so that this CSP activity can be carried out and completed properly. For that I would like to thank my parents, as well as my big family who have given me motivation both materially and non-materially, so that I can complete this Community Service Program well. I also thank to the relevant parties who have supported and guided me in completing the program during Covid-19 2020, namely:

1. Pof. Dr. Ganefri, Phd, as the rector of the Padang State University.
2. Dr. Elfi Tasrif, MT, As the head of the Padang State University Community Service Program 2020
3. Rifelino, S.Pd, MT, as the Field Supervisor.
4. Aswar, SH, as the Head of the Panti Sub-District, Kab, Pasaman.
5. Aswar Karim, as the village chairman of South Panti.
6. Asran Irsyah, as village chairman East Panti.
7. Yefri Aldi, as Walinagari Panti.
8. Hj Masniari, S.Pd, As head of Junior High School 1.
9. Adrinofia, S.Pd, M.Pd, as the Principal of MTsN 3 Pasaman.
10. Gundur, S.Pd, as the Principal of Junior High School 2, Panti
11. All parties that the author cannot possibly mention one by one who have helped carry out the Covid-19 Online Community Service activities smoothly.

I am aware that this final report is still far from being perfected in its true sense, but I hope that this report will be of use to myself and to readers in general.

Panti, 29 July 020

Juwita Khairani

## A. INTRODUCTION

### 1. Background

Community Service Program (CSP) is a comprehensive application, in the field of scientific disciplines, of its theories into a tangible form of community service whose application is carried out in a network or long distance due to the situation of the Covid-19 Pandemic. CSP) is a compulsory program that students must take as one of the requirements for ending undergraduate studies (S1), of course, with the academic requirements previously determined and fulfilled by final year students.

With the Real Work Lecture (CSP), students are expected to be able to apply and utilize the knowledge they have acquired in college into real life in the midst of society. Students are expected to be able to adapt and interact socially with the community so that later they are expected to be able to help solve problems that occur in society, of course, with the application of knowledge that has been obtained in college.

Real Work Lecture (CSP) provides great benefits to students and the community, where Real Work Lectures are held in order to gain real experience in the field, thus providing provisions for students when they have graduated and are involved in real life. Whereas the benefits for the community are the problems and problems faced in the community as much as possible that can be resolved and assisted in resolving them by students who are carrying out CSP, especially problems that arise in all aspects due to the Covid-19 pandemic.

This Real Work Lecture (CSP) is a manifestation of the participation of universities in an effort to develop and increase empowerment and community participation in the demands of the progress of the times, especially the development of science and technology through students. In this activity, students will have various experiences, ranging from trying to adapt, socializing, and helping each other in carrying out various work programs to providing solutions to problems that arise in the internal CSP participants as well as those that occur in a pluralistic society such as the Panti District. especially the problems arising from this pandemic.

The 2017 Padang State University Online Real Work Lecture System (CSP) is a form of community service which is expected to fulfill a maximum of 9 work programs that have been set by the University, namely: Digital learning services for SD / SMP / and SMA, socialization and education prevention of covid-19, data collection of population mobility affected by Covid-19, manufacture of infectious agents, mapping of the Covid-19 area,

extension of food assistance / basic necessities for the poor, making personal protective equipment, and strengthening the economic efforts of people affected by covid-19.

This report is a documentation of the real work of Padang State University students who are assigned to serve in their own areas, especially helping local communities affected by Covid-19 in Panti Sub-district.

Because the Panti District is a green zone, therefore I and my friends from the Panti District only completed 4 workshops out of the maximum 9 work programs set by the University in the 2020 Online Community Service Program.

## 2. Formulation of the Problem

Based on the background above, the problem formulation is as follows:

- a. How are the activities carried out?
- b. How is the achievement of each activity?
- c. What obstacles did you face?
- d. What is the solution?

## 3. Activity Purpose

With the formulation of the problems above, the purpose of this report is to describe the development and journey of the Covid-19 Online Community Service 2020 activities in helping people affected by Covid-19 in their own areas according to the activities programmed by the University during the current pandemic and according to the New Normal (transitional) health protocol.

## 4. Benefits

The benefits of real work lectures (CSP) at Padang State University in Panti District (Southern Panti Nagari, East Panti Nagari and Panti Nagari) are as follows:

### a. For Students

- Students can collaborate and apply practical theories that they already have and how to socialize in relation to the knowledge they have learned while attending lectures at Padang State University, especially during the Covid-19 pandemic in the current New Normal era.
- As a form of implementing the Tridarma of Higher Education, namely Community Service.
- Increase knowledge and experience in society in accordance with the norms prevailing in society.

- Seek and find and take part in solving problems with scientific concepts and theories found in the midst of society, especially problems that arise due to the Covid-19 pandemic.

b. For the Community

- The public can gain new knowledge on how to socialize during the COVID-19 pandemic in the New Normal era
- People can gain new knowledge about how to make and use a natural Face Shield and Handsanitizer.
- Obtaining thought assistance as well as science, technology and art in carrying out the learning process in the midst of the Covid-19 New Normal Era.
- Increase public awareness to be more productive and active even in the midst of a pandemic by continuing to do activities outside the home by implementing health protocols.

## **B. DESCRIPTION OF ACTIVITY**

### 1. Activities

#### a Dissemination of Covid-19 Prevention Socialization and Education Brochures

My first work program was the distribution of socialization and education brochures for the prevention of covid-19 at crowded points such as traditional markets, public places, and coffee shops. I did this activity with my friends from class 17 in the Panti sub-district, starting from June 22-28 2020.

On the first day of the activity, on June 22, 2020, we prepared and planned activities, starting from submitting a CSP permit to villages in the Panti sub-district to a technical discussion meeting on field activities. We started this activity at 10.00 WIB, which was the submission of a letter to the Nagari Panti Selatan and ended at 16.00 WIB at the Panti sub-district office. Alhamdulillah, on this first day our arrival was greeted with joy by Mr. Aswar, SH as the head of the orphanage.

The second day, June 23, 2020, Padang State University led by the Chancellor of UNP Prof.Dr. Ganefri, Ph.D. Online released approximately 7000 UNP 2017 students from CSP 2020 students from all regions in West Sumatra and outside West Sumatra to Walinagari or the sub-district head where the student is domiciled.

The third day, July 24, 2020, I and my friends from the UNP CSP student group went down for the first time to carry out the Online CSP activity program starting at Tanjung Medan Market at 08.00 and ending at 13.00 WIB. Then our group divided two lines to paste brochures on the spot. -public areas and coffee shops. The total number of brochures that we have distributed in the market is approximately 100 brochures and in coffee shops and public places there are approximately 100 brochures, the funds from the printing of this brochure we get from group fees of 5000 per person and in one group we are 20 people.

We ended the distribution and attachment of this brochure on Sunday at the Petok market on June 28, 2020 at 14.00 WIB. After that we conducted an evaluation of activities in this first work program at the Ampangadang Dam, Nagari Panti Selatan, Panti District.

b. Spraying Disinfectant to Places of Worship

My second work program is spraying disinfectants into places of worship, such as: mosques and churches. I am still doing this activity with 20 UNP online CSP students throughout the Panti sub-district. We carried out this activity from June 30 - July 6, 2020, we obtained tools and materials in the implementation of this program from the assistance of several parties, namely assistance from relatives of South Panti Students in the form of 10 liters of disinfectant, 2 sprayers. 18 pieces of hand soap, 18 pieces of Paseo tissue, and 6 refillable sachets of WIPOL 780 ml from Walinagari Panti Timur. The last one was assistance from the Head of the orphanage in the form of 3 refillable WIPOL sachets of 780 ml and 100,000 cash. We will start this activity on June 30, 2020 at 08.00 and end at 16.00 WIB. On the 8th day of this activity, we prepared and planned the type of spraying for the CSP DR disinfectant in the second week of the entire orphanage district, starting from Nagari Panti Selatan, Nagari Panti Timur, and Nagari Panti. Both in the form of handing over tools and borrowing VIAR vehicles as a means of transportation to carry equipment for spraying activities. In this case, the cost of borrowing VIAR is IDR 100,000 and vehicle fuel is IDR 100,000 for 7 days of spraying activities. Our spraying activities started on July 1, 2020 at 08.00 WIB at the mosque in Jr. Ampangadang and Tj. Medan, Nagari Panti Selatan. And it ended at 16.00 WIB in Air Salo village, at that time we rested while resting to prepare for spraying the next day. We carried out this disinfectant spraying activity for 7 days ending on Monday 6 July 2020 at the Protestant Panti Church. After that we returned the vehicle we had borrowed and paid the rent. As the closing of the second work program in the second week of the Community Service Program, we conducted an evaluation in Medan Papaneh Panti.

c. Making Face Shield and Natural Hand Sanitizer

In the third week of CSP DR UNP, I and my friends from the CSP group carried out the third Work Program, namely Making ADP in the form of Face Shield and Natural Hand Sanitizer. We carried out this activity starting from 7-15 July 2020 and the implementation of this work program we received funds from group fees of Rp. 30,000 per person and assistance from Mrs. Walinagari at the orphanage of Rp. 250,000. In the manufacture of Natural Hand Sanitizer we use natural ingredients found in the local area, namely Fragrant Lemongrass, Aloe Vera, Lime and Betel. We made two hand

sanitizer products that have different ingredients, the goal is that the target community can get the tools and assistants who are the dean of their area.

We carried out the activity for the first time on Tuesday, July 7, 2020, on that day we made 300 Face Shield Units which will be given to three regions, namely Nagari Panti Selatan, Nagari Panti and Nagari Panti Timur. We created this Face Shield aimed at nagari officials who cannot leave their activities outside the home, schools, and posyandu cadres.

On 8-9 July 2020, I along with other UNP Community Service friends collected tools and materials for Natural Hansanitizer as well as compounding and making the Hansanitizer which will be distributed in the next 6 days.

On Thursday, July 10, 2020, we carried out outreach activities and training on how to make Natural Hansanitizer for the cadres of Posyandu in Nagari Panti Timur. A total of 12 cadres who came were accompanied by Nagari apparatus. At that time we also handed over the face shields that we had made to the cadres.

In the third week of this Community Service Program, our program was very solid, starting from training and counseling on the manufacture of hand sanitizers to posyandu cadres, handing over face shields to the intended agency, and assisting the mayor in verifying the administration of the BLT Regency and BLT Nagari recipients.

Our program ended on Wednesday 15 July 2020 at the Panti sub-district office, namely the handover of Handsanitizer and Face Shield activities to sub-district agency which was received directly by the Head of Panti Mr. Aswar, SH.

d. Digital Socialization of Junior High School Learning Services

My last CSP program is also the 4th week of work program and the closing program for the DR Covid-19 CSP activities at Padang State University. This last work program is the socialization of one of the digital learning services, namely Classroom to junior high schools in the Panti sub-district such as: SMP Negeri 1 Panti, MTsN 3 Pasaman, and SMP Negeri 2 Panti. We did this activity for 8 days, starting from 17 - 24 July 2020.

The activity starts from preparing the tools and materials needed during the implementation of activities such as submitting a permit vote, making PPT, collecting materials, and distributing and making technical guidelines for activities. This activity started from SMP Negeri 1 Panti and ended at SMP 2 Panti and thank God the principal and subject teachers were very enthusiastic in participating in this activity. July 24, 2020

is our last day of CSP, we prepare a few mementos that we will leave at our supporting and mentoring agencies in the Completion of this DR 2020 CSP where we will initially hand over the mementos on the same day, but due to obstacles from several agencies finally parted ways and at the same time the delivery of our mementos was postponed until July 27, 2020.

## 2. Achievement Each Activities

Overall, the achievements of all the activities have been very satisfying and can be called successful, judging by the enthusiasm of the people who have worn masks at the market and in public places. Maintaining hygiene by diligently washing hands, and knowing the impact of the Corona Virus when viewed from the side of its spread through the distribution of Covid-19 prevention brochures, from the point of view of spraying disinfectants it can also be called successful because the mosque guards are very happy when we spray there, he hopes that with With this spraying, the congregation did not hesitate to come to the mosque to carry out worship by following health protocols. When viewed from the side of making natural hand sanitizers, posyadu cadres are very enthusiastic and they also feel it is the first time to do this kind of activity.

Could be said to be successful because the posyandu cadres who conducted the training were able to practice it at least in their own homes. And lastly, the digital socialization of learning services was also said to be successful because the subject teachers who participated in the socialization activity were able to know the benefits of digital learning services and were able to recognize one of the newest digital learning services that they had never tried before, namely classroom, this can be seen from the enthusiasm of the participants in the socialization and good motivation to ask questions.

## 3. Obstacles encountered

In the implementation of this online CSP, of course, there are obstacles that hinder the maximum activity of the Kec. Orphanages, including:

- a. The mobility of CSP students is constrained by costs and transportation.
- b. Lack of funds in making Face Shield
- c. The activity time is limited so that it is not maximally carried out.

#### 4. Solution

- a Minimizing activities that require a lot of money, such as initially our target of making 500 face shields was minimized to 300 face shields
- b In spraying disinfectants because it covers three villages, it makes us short of time in the process of spraying disinfectants in places of worship, so we sort out the places of worship that are the most crowded.
- c Mobility problems, constrained by our vehicle/transportation fuel. Because there are still many people in our area who don't have social media, so we go directly to the community to visit their places of residence, so sometimes limited vehicles are an obstacle, that's why we borrow VIAR so we can accommodate friends who don't have vehicles.

## C. CONCLUSION AND SUGGESTIONS

### Conclusion

The conclusions that can be drawn during this Covid-19 Online Community Service Program are:

1. The socialization of Covid-19 prevention was carried out by distributing brochures at ceramic points and attaching brochures in public places and coffee shops as many as 300 sheets to 3 villages in the Panti District, starting from the South Panti Nagari, East Panti Nagari, to Panti Nagari.
2. Spraying disinfectants at places of worship in Panti District, such as mosques and churches ranging from South Panti Nagari, East Panti Nagari to Panti Nagari.
3. Making 300 units of Face Shield and Natural Handanitizer intended for Agencies that continue to carry out activities outside the home, school and counseling as well as distributing face shields to posyandu cadres in Panti District, starting from the South Panti Nagari, East Panti Nagari and Panti Nagari.
4. Assist Walinagari in verifying the administration of the people who receive BLT Regency and BLT Nagari.
5. Conducting digital socialization of learning services, one of which is Classroom and the delivery of Face shields to help the offline learning process to educational institutions at the junior high school level in Panti District, starting from SMP Negeri 1 Panti, SMP Negeri 2 Panti and MTsN 3 Pasaman.
6. Alhamdulillah, praise to God all CSP activities can be said to be successful even though there are some obstacles and God willing, they can be overcome with solutions that are considered effective.

### Suggestion

After various KKN student activities related to the Covid-19 pandemic, it is hoped that the community will continue to implement and pay attention to health protocols even though it has entered the New Normal Era and God willing, will switch to Normal if people remain disciplined.
